Subject: Lowerline. Scanner Van

Next week, the Las Vegas Radiation Center is going to be using their scanner van and buggies to verify cleanup and to make sure that no other streets are contaminated. The van and buggies are fairly unique and I think pretty interesting.

I don't plan on being there with the move and other obligations I have. But if you would like to experience it, make your travel and head that way.

The office trailer is on the corner of Lowerline and Olive. The 3400 block of Lowerline. George Brownsoski, our Regional Radiation Safety Officer will be there. I'll send his number.

They are flying or driving in on Monday, I don't expect a lot of work that day. They will probably go till Friday.

Go find out about the van and the team etc. and be our expert.
